EXPERIENCE

Web Development Committee Member — September 2022 - Jan 2023
Rose Hack — *Riverside, CA*

- Collaborated with a cross-functional team to strategize, plan, and execute a highly successful hackathon event.
- Utilized expertise in HTML, CSS, JavaScript, and Figma to design, develop, and maintain the hackathon website, implementing responsive design and user-friendly features at home and login pages.

ITS Multimedia Operator — July 2023 - Present
University of California, Riverside — *Riverside, CA*

- Ensured seamless integration of classroom technology, including Windows, Mac, iOS platforms, microphones, touch monitors, and projectors by providing expert assistance and training for faculty members.
- Delivered proficient technical support for audiovisual equipment, computers, and networked controllers, optimizing event operations and providing exceptional customer service.

PROJECTS

mysmply. A Pomodoro-inspired, simplistic study timer, effectively helping students work without distraction. Built using HTML, CSS, Figma, and JavaScript. Hosted on AWS Amplify.

EXTRA-CURRICULAR ACTIVITIES

Design @ UCR

- Curated visually appealing mock-ups for team web development projects using Figma, ensuring seamless user experience and effective communication of design ideas.
- Implemented logic and functionality using JavaScript, enhancing the interactivity and responsiveness of web applications.
- Hosted web applications on AWS (Amazon Web Services), ensuring reliable performance and scalability for users.
